

MARYLAND DEPARTMENT OF THE ENVIRONMENT
GENERAL PERMIT FOR STORMWATER ASSOCIATED WITH CONSTRUCTION ACTIVITY
General NPDES Permit Number MDR10
State Discharge Permit Number 09GP

EFFECTIVE DATE: January 1, 2009 EXPIRATION DATE: December 31, 2013

PART I. COVERAGE UNDER THIS PERMIT

A. NOI Approval Process and Public Review Period

1. Certification of Erosion and Sediment Control Submission to Approval Authority.

Maryland Department of the Environment (MDE) will begin processing a Notice of Intent (NOI) to be covered under this general permit when the applicant provides certification that an erosion and sediment control plan (ESC plan) was submitted to the appropriate approval authority. If an NOI is submitted before the Erosion and Sediment control plan is submitted to the approval authority, MDE will not accept it for processing and will send notice to the applicant that the NOI is incomplete and will not be processed until the required information is provided. MDE will regularly post NOI information on the MDE Website to include all NOIs submitted during the previous week.

2. Processing Period and Issuance of Coverage NOIs for Sites with 3 Acres or More of Disturbed Area.

In order to provide opportunity for public review of plans for sites to be covered by this permit, MDE will not act on NOIs for construction sites composed of 3 acres or more of disturbed area during a minimum 45-day period that begins on the date the NOI information is posted on the MDE Website. After 45 days have elapsed and following MDE's receipt of notification from the applicant demonstrating that the Erosion and Sediment Control Plan for the project has been approved by the appropriate approval authority MDE will make every reasonable effort, within 48 hours of said 45-day period, to issue notification that the site is covered under the general permit for stormwater associated with construction activities, with the exception described in paragraph 4 of this section. If an NOI is submitted to MDE after the appropriate approval authority has already approved an Erosion and Sediment control plan, MDE will advertise the submission of the NOI, but will not act on the NOI for 45 days. If no adverse comments are received during the 45 days then the NOI will be processed like all other NOIs.

3. NOIs for Sites that Involve at Least One Acre but Less than 3 Acres of Disturbed Area .

MDE will not act on NOIs for construction sites that involve one acre or more but less than 3 acres of disturbed area during a 30-day period that begins on the date the NOI information is posted on the MDE Website. After 30 days have elapsed and following MDE's receipt of notification from the applicant demonstrating that the Erosion and Sediment Control Plan for the project has been approved by the appropriate approval authority, MDE will make every reasonable effort, within 48 hours of said 30-day period, to issue notification that the site is covered under the general permit for stormwater associated with construction activities, with the exception described in paragraph 4 of this section. If an NOI for a construction site that involves less than 3 acres but at least one acre or more of disturbed area is submitted to MDE after the appropriate approval authority has already approved an Erosion and Sediment Control Plan, MDE will advertise the submission of the NOI, but will not act on the NOI for 30 days. If no adverse comments are received during the 30 days then the NOI will be processed like all other NOIs.

4. Exception to NOI Approval Process.

If MDE receives, prior to issuance of General Permit coverage, a request from any person that the site be required to obtain an individual permit with a detailed, written explanation as to why the Erosion and Sediment Control Plan fails to meet State erosion and sediment control or stormwater management standards, MDE will do the following: (i) notify the general permit applicant that a request that an individual permit be required has been received, (ii) evaluate the information, and (iii) make a decision and send notification of that decision to the NOI applicant and the person requesting that an individual permit be required as described in Section I.D.

5. Regular Update of NOI approvals on MDE's Website

Each week MDE will update information on the MDE Website to show all NOIs approved during the previous week.

B. Permit Applicability to Areas in Maryland

This permit covers all areas of the State of Maryland.

C. Eligibility

1. What This Permit Covers:

This permit covers all new and existing stormwater discharges that are composed in whole or in part of discharges associated with construction activity [as defined by 40 Code of Federal Regulations (40 CFR), Section 122.26 (b)(14)(x) and Section 122.26(b)(15)(i); see Part VIII, Definitions]. This permit is not an alternative for and does not take the place of any local permits or ordinances required by Maryland law or regulation or by the county or municipality that has jurisdiction where the construction activity occurs, including but not limited to a grading permit, erosion and sediment control plan approval, or stormwater management plan approval.

2. Facilities with a permit for a non-stormwater discharge.

Stormwater discharges associated with construction activity at facilities which have a permit for a discharge other than stormwater can be covered by this general permit, an alternative general permit, or, at the discretion of the Director, an existing individual permit may be amended to cover stormwater discharges associated with construction activities.

D. Requiring an Individual Permit or an Alternative General Permit

1. The Director may require any person authorized by this permit to apply for and obtain either an individual permit or coverage under an alternative general permit. Any interested person may petition the Director to take action under this paragraph. The Director may require any person authorized to discharge under this permit to apply for an individual permit or obtain coverage under an alternative general permit only if that person has been notified in writing that such a change is required. This notice shall include:
 - a. A brief statement of the reasons for this decision;
 - b. A statement setting a deadline for the notified person to file an application for an individual permit or a file a NOI in accordance with the terms of the alternative general permit;
 - c. A permit application if applicable; and
 - d. For existing permittees, a statement that on the effective date of the individual permit or the alternative general permit as it applies to the individual permittee, coverage under this general permit shall automatically terminate.
2. The Director may grant additional time to submit the application or NOI upon request of the applicant. If the person so notified fails to submit in a timely manner an individual permit application or an NOI for coverage under an alternative general permit as required by the Director under this paragraph, then the individual permittee's coverage under this permit is automatically terminated at the end of the day specified in the Director's notification.
3. Any person authorized by this permit may request to be excluded from the coverage of this permit by applying for an individual permit or filing an NOI for coverage under an alternative general permit. The person seeking an individual permit shall submit an individual application in accordance with the United States Environmental Protection Agency's (EPA) National Pollutant Discharge Elimination System (NPDES) regulations at 40 C.F.R. Part 122, with reasons supporting the request to the Director. The person seeking coverage under an alternative general permit shall file an NOI in accordance with the terms of the alternative general permit. A request for an individual permit shall be granted if the Director determines that the reasons cited by the applicant are adequate to support the request. If the applicant seeks coverage under an alternative general permit, the terms of that permit will determine whether coverage under the alternative general permit is obtained.
4. When an individual permit is issued to a person otherwise covered by this permit, the applicability of this permit to the individual permittee is automatically terminated on the effective date of the individual permit. Similarly, when a person subject to this permit obtains coverage under an alternative general permit, the applicability of this permit is terminated on the effective date of the alternative general permit. When an individual permit is denied to an applicant otherwise covered by this permit, or the applicant is denied coverage under the terms of an alternative general permit, the applicability of this general permit to the permittee may be terminated by MDE.

- E. **Authorization.** A person planning construction activity must have coverage under an approved NOI to be authorized to discharge stormwater under this general permit. Unless notified by the Director to the contrary, persons who have coverage under an approved NOI are authorized to discharge stormwater associated with construction activity under the terms and conditions of this permit.
- F. **Transfer of Authorization.**
1. Transfer of control of permitted activities at the site. A person submitting an NOI who does not intend to control the permitted activities on the site shall transfer authorization under this permit, at least 48 hours prior to any land disturbing activities, to a duly authorized person who will control the permitted activities. The transfer shall become effective upon receipt by the Administration of a completed Transfer of Authorization form, signed by both the transferor and transferee. The Transfer of Authorization form shall include a specific statement that the transferee will abide by all conditions of the erosion and sediment control plan and stormwater management plan. Should the permittee decide to transfer authorization under this permit during the construction period, written notification (as outlined above) must occur immediately.
 2. Transfer of property to a new owner. A permittee may transfer coverage under this general permit to a new owner should ownership change during the construction period. The transfer shall become effective upon receipt by the Administration of a completed Transfer of Authorization form, signed by both the transferor and transferee. The Transfer of Authorization form shall include a specific statement that the transferee will abide by all conditions of the erosion and sediment control plan and stormwater management plan.
 3. Obligations of the permittee. The permittee ("transferor") must familiarize the person who is assuming control of the permitted activities ("transferee") or the new owner, in the case of an ownership change, with the program and provide the transferee/new owner with a copy of this general permit. All conditions and obligations outlined in this general permit will apply to the new permittee/owner upon transfer.

Part II. NOTICE OF INTENT REQUIREMENTS

A. Deadlines for Notification.

1. For construction activity beginning on or after January 1, 2009:
Persons who intend to obtain coverage for a stormwater discharge associated with construction activity under this general permit shall submit an NOI in accordance with the requirements of Part I. Section A and shall not perform any land disturbing activities prior to receiving NOI approval.
2. For construction activity beginning prior to, and continuing past, January 1, 2009, and currently covered under a previous version of this general permit:
Permittees whose projects are currently covered under a previous version of the general permit will be covered under the new general permit, effective January 1, 2009 (General Permit), when it becomes effective. Compliance with all requirements under the new General Permit, effective January 1, 2009, is required for an additional phase or phases of multi-phased project not covered under the pre-existing NOI.
3. Persons who obtain coverage under this general permit shall, prior to commencing construction, develop and obtain approval from appropriate approval authority of: (i) erosion and sediment control plans in accordance with the requirements established in Title 4, Subtitle 1 of the Environment Article, Annotated Code of Maryland (Sediment Control); and in Code of Maryland Regulations (COMAR) 26.17.01 (Erosion and Sediment Control); and (ii) stormwater management plans in accordance with the requirements established in Title 4, Subtitle 2 of the Environment Article, Annotated Code of Maryland (Stormwater Management); and in COMAR 26.17.02 (Stormwater Management). Erosion and Sediment Control Plans and Stormwater Management Plans required under the general permit (with the exception of those plans for sites previously covered under a previous version of the general permit) shall include a written explanation demonstrating that the plan addresses these critical points of interest in addition to the basic elements included in those plans:
 - a. Utilization of Environmental Site Design during all phases of design and construction, including but not limited to early construction and development of site design, continuation of Environmental Site Design from first disturbance to

- post-construction. Such Environmental Site Design shall be included in an approved Erosion and Sediment Control Plan or Stormwater Management Plan.
- b. Maintenance of the limits of disturbance shown on plans are inclusive, consistent and prevent disturbance to streams, natural drainage features, stream buffers, soil conservation areas, wetlands, and forest conservation areas during construction except as specified in an approved Erosion and Sediment Control Plan.
 - c. Control of construction equipment and vehicles so that they do not enter areas reserved for future stormwater infiltration or recharge except as specified in an approved Erosion and Sediment Control Plan.
 - d. Evaluation and appropriate limitation of site clearing needed to accommodate the building and transportation footprint at low-density sites so as to minimize impacts as specified in an approved Erosion and Sediment Control Plan or Stormwater Management Plan.
 - e. Evaluation and designation as to whether there is a minimum site area where construction phasing or sequencing must be used on specific sites in accordance with an approved Erosion and Sediment Control Plan.
 - f. Identification of soils at high risk for erosion and designation of advanced stabilization techniques, such as geotextile erosion control mats and blankets, mulch and turf reinforcement, for such soils on specific sites in accordance with an approved Erosion and Sediment Control Plan.
 - g. Identification of steep slopes and designation of limitations on clearing on the steep slopes on specific sites in accordance with an approved Erosion and Sediment Control Plan.
 - h. Evaluation and designation of stabilization requirements, such as hydroseeding, mulch, etc., including a time limit to initiate stabilization after soil has been exposed, on a site-by-site basis to minimize exposure of disturbed areas and visible dirt in accordance with an approved Erosion and Sediment Control Plan.
 - i. Protection measures for discharges to the Chesapeake Bay or impaired waters or waters with an established TMDL.

B. Application. The applicant shall submit to the Administration an NOI to be covered under this general permit. The NOI will constitute application and must be accompanied by the appropriate fee required by the Administration and established in State regulations to be considered complete. An applicant may submit an NOI form in accordance with the requirements of this Part after the applicable deadline. In such instances, an enforcement action for any stormwater discharges associated with the construction activity occurring prior to notification may be taken.

C. Failure to Notify. Persons who disturb earth as part of a construction activity and fail to notify the Director of their intent to be covered by an NPDES stormwater discharge permit as required herein, and discharge pollutants to waters of the United States without a permit, are in violation of the Clean Water Act (CWA). Persons who disturb one acre or more of earth and fail to notify the Director of their intent to be covered, and discharge pollutants to waters of the State are in violation of Section 4-413 and 9-322 of the Environment Article, Annotated Code of Maryland.

D. Contents of Applications. As stated in Part II. B. above, an NOI to be covered under this general permit will constitute application. The NOI shall include, but not be limited to, the following:

1. The site's name, mailing address, and general location;
2. The site's latitude and longitude (to the nearest 15 seconds) and Maryland Grid Coordinates (for the approximate center of the site);
3. A map of the site;
4. The permittee's name and signature, address, telephone number, and principal contact;
5. A brief project description, including existing and proposed land uses;
6. Standard Industrial Classification (SIC);

7. The name of the eventual receiving waters (if the discharge is to a municipal separate storm sewer system, the name of the municipal system and the receiving waters shall be supplied);
 8. A confirmation that the permittee has compared the eventual receiving waters with the Maryland 303(d) list, the date on which the comparison took place, and a statement as to whether the eventual receiving waters are listed on the 303(d) list as impaired for sediment. Indicate the name and location of the impaired waters.
 9. The total site area, the total proposed disturbed area, the type(s) of stormwater management best management practice(s) (BMP) proposed, and the total drainage area to be controlled by each type of BMP; and
 10. Permit number of any other NPDES Permit related to this site.
- E. Fees.** An application fee is required with the submission of the NOI form. The fee schedule is based on the size of the total planned disturbance. The applicant should determine the appropriate fee to be paid from the fee schedule set in State regulations.
- F. Where to Submit.** Persons intending to discharge stormwater associated with construction activity must submit erosion and sediment control and stormwater management plans in accordance with procedures established in, and to the approving authorities identified in, the laws and regulations cited in Part II. of this general permit. Applications (NOIs) for coverage under this general permit shall be mailed to the Administration at the following address:
- The Maryland Department of the Environment
Water Management Administration
P.O. Box 2057
Baltimore, Maryland 21203-2057
- G. Effective Date of Coverage.** Coverage under this general permit is effective as described in Part I. A. The completed application (NOI form) must be accompanied by the appropriate fee as outlined in Maryland regulations and in Part II. E. above. The effective date for Transfer of Authorization shall be in accordance with Part I.F. Coverage under this general permit will expire when the General Permit is reissued or expires, or when a Notice of Termination form has been completed and received by MDE, whichever occurs first.
- H. Notice of Termination.** When all portions of a site have been permanently stabilized as defined herein, and all stormwater discharges from construction sites that are authorized by this permit are eliminated, the authorized permittee of the facility must submit a Notice of Termination form, which may be obtained through MDE's Website or upon request to MDE.
1. The Notice of Termination shall include, but not be limited to, the following:
 - a. The mailing address and location of the construction site for which notification is submitted. Where a mailing address is not available, the location can be described in terms of the latitude and longitude (to the nearest 15 seconds) and Maryland Grid Coordinates of the approximate center of the facility;
 - b. The permittee's name, address, and telephone number;
 - c. The name, address, and telephone number of the general contractor(s);
 - d. The NOI identification number;
 - e. The following certification statement, signed as required by section VI.J. herein:
"I certify under penalty of law that disturbed soils at the identified site have been acceptably and permanently stabilized and that temporary erosion and sediment controls have been removed or will be removed at an appropriate time and that all stormwater discharges associated with construction activity from this site that are authorized by this general permit have been eliminated. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge stormwater associated with construction activity by the general permit and that discharging pollutants in stormwater associated with construction activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by an NPDES permit. I also understand that the submittal of

this Notice of Termination does not release the permittee from liability for any violations of this permit or the Clean Water Act which may have occurred at this site."

2. The completed Notice of Termination form shall be sent to the following address:

The Maryland Department of the Environment

Compliance Program

Water Management Administration

P.O. Box 2057

Baltimore, Maryland 21203-2057

Part III. SPECIAL CONDITIONS

A. Prohibition against Non-Stormwater Discharges.

1. All discharges covered by this permit shall be composed entirely of stormwater, except as provided below in paragraph 4.
2. Discharge of material other than stormwater must be in accordance with erosion and sediment control and stormwater management plans approved in accordance with the laws and regulations cited in Part II. A. above.
3. Discharges of material other than stormwater must be in compliance with an NPDES permit (other than this permit) issued for the discharge.
4. The following non-stormwater discharges may be authorized by this permit provided the non-stormwater component is a discharge from: fire fighting activities; fire hydrant flushings; air conditioning condensate; uncontaminated spring water; and foundation or footing drains where flows are not causing an erosive condition or contaminated with process materials such as solvents.

B. Other Requirements for Erosion and Sediment Control and Stormwater Management Plans.

1. All plans for construction activity and any reports prepared pursuant to this permit, including self-inspection information, shall be available to the public under Section 308(b) of the CWA.
2. Upon request by the public, the permittee or person covered by this general permit shall make such documents available. However, the permittee may claim applicable portions of these documents as confidential in accordance with 40 Code of Federal Regulations (CFR) Part 2.

C. Releases in Excess of Reportable Quantities. In the event of a discharge of hazardous substances or oil from a construction site, such discharge shall be minimized and/or contained in accordance with the approved erosion and sediment control and stormwater management plans.

1. Where a release containing a hazardous substance or oil in an amount equal to or in excess of a reporting quantity established under either 40 CFR 110, 40 CFR 117, or 40 CFR 302, occurs during a 24 hour period:
 - a. The permittee shall notify the National Response Center (NRC) as soon as he or she has knowledge of the discharge at 1-800-424-8802 or 202-267-2675 (in the Washington, DC metropolitan area), in accordance with the requirements of 40 CFR 110, 40 CFR 117, and 40 CFR 302;
 - b. The permittee shall notify the Maryland Department of the Environment as soon as he or she has knowledge of the discharge. The contact numbers are 410-537-3510 between 8AM - 5PM or after hours at 410-537-3937;
 - c. The permittee shall submit within 7 calendar days of knowledge of the release an application for individual permit coverage in accordance with the requirements of 40 CFR 122.26(c)(1)(ii), with a written description of the release, the circumstances leading to the release, the nature and date of the release, and steps taken to control and respond to the release. This application should be sent to the Maryland Department of the Environment, Water Management Administration;
 - d. The permittee shall, within 14 days of knowledge of the release, modify the existing erosion and sediment control and stormwater management plans to identify and provide for the implementation of steps to prevent and control the recurrence of such releases or similar releases in the future, and to respond to such releases. The permittee

shall also provide notification to the Maryland Department of the Environment that the erosion and sediment control plan and stormwater management plan modifications have been completed and approved by the appropriate approval authority.

2. Discharges of hazardous substances and oil resulting from on-site spills are not authorized by this permit.
3. No condition of this general permit shall release the permittee from any responsibility or requirements under other environmental statutes or regulations.

Part IV. EFFLUENT LIMITATIONS, PREVENTION OF THE DISCHARGE OF SIGNIFICANT AMOUNTS OF SEDIMENT, MONITORING, RECORDING AND REPORTING REQUIREMENTS

A. Effluent Limitations.

1. The permittee must select, install, implement and maintain control measures (i.e., BMPs, controls, practices, etc.) at the construction site that minimize pollutants in the discharge as necessary to meet applicable water quality standards. The permittee must implement the control measures from commencement of construction activity until permanent stabilization is complete. In general, the stormwater controls developed, implemented, and updated consistent with the laws and regulations cited in Part II.A. of this general permit are considered as stringent as necessary to ensure that discharges covered by this permit do not cause or contribute to an excursion above any applicable water quality standard.
2. At any time after authorization, MDE may determine that the permittee's stormwater discharges may cause, have reasonable potential to cause, or contribute to an excursion above any applicable water quality standard. If such a determination is made, MDE will require the permittee to:
 - a. Modify the stormwater controls to adequately address, achieve and document the identified water quality concerns;
 - b. Submit valid and verifiable data and information that are representative of ambient conditions and indicate that the receiving water is attaining water quality standards; and/or
 - c. Cease discharges of pollutants from construction activity and submit an individual permit application according to Part I.D.

B. Prevention of the Discharge of Significant Amounts of Sediment. In addition to Part IV.A. above, the permittee must take all reasonable measures to prevent the discharge of significant amounts of sediment to surface waters, or conveyance systems leading to surface waters, particularly in the Chesapeake Bay watershed or impaired waterways.

1. Conditions indicating discharge of significant amounts of sediment include, but are not limited to, the following:
 - a. Earth slides or mud flows;
 - b. Concentrated flows of stormwater such as rills, rivulets or channels that cause erosion when such flows are not filtered, settled or otherwise treated to remove sediment;
 - c. Turbid flows of stormwater that are not filtered, settled or otherwise treated to reduce turbidity;
 - d. Deposits of sediment at the construction site in areas that drain to unprotected stormwater inlets or catch basins that discharge directly to surface waters;
 - e. Deposits of sediment from the construction site on public or private streets outside of the permitted construction activity;
 - f. Deposits of sediment from the construction site on any adjacent property outside of the permitted construction activity; or
 - g. Discharges from the construction site to municipal conveyances, curbs and gutters, or streams running through or along the site where visual observations show that the

discharges differ from ambient conditions in terms of turbidity so as to indicate significant amounts of sediment present in them.

2. If the permittee observes any of the triggering events described in Section IV.B, above, or if any person informs the enforcement authority or MDE of a triggering event and the enforcement authority or MDE informs the permittee that one or more of the triggering events was verified, the permittee must undertake the following actions and record the dates and results of these actions in an onsite logbook.
 - a. Within one day the permittee shall inspect erosion and sediment control practices to verify compliance with its approved Plans. Any deficiencies, including, but not limited to, failure to follow the approved sequence of construction, failure to maintain approved buffers, grading beyond the limit of disturbance, or any approved sediment and erosion controls found to be missing, improperly installed or in need of maintenance must be corrected immediately and may be considered to be a violation of this permit until such time that they are corrected.
 - b. If the site is found to be in compliance with its approved Plans, the permittee shall, by the next business day, contact the enforcement authority for the site and appropriate approval authority for Erosion and Sediment Control and inform the authorities about the conditions observed during the inspection cited above. In addition to any requirements imposed by the delegated enforcement authority or MDE, the permittee shall, after notifying the enforcement authority, implement any of the following that are determined to be appropriate towards the prevention of further triggering events:
 - (1) Any change that may be approved in the field by the inspector for the enforcement authority for the site;
 - (2) Modifications to the Plans allowed as field modifications by the approval authority;
 - (3) Performing temporary or permanent seeding of disturbed areas more frequently than required by the approved Plan or regulation; or
 - (4) Increasing buffer distances.The permittee shall implement any changes needed based on the above review within four days after the triggering event is observed.
3. If additional triggering events are observed, the permittee shall, through its site engineer, determine if the Erosion and Sediment Control Plan and Stormwater Management Plan are adequate, or whether additional on-site practices or plan modifications are required. Within three days of the second observation of a triggering event, the permittee shall contact the enforcement authority for the site and approval authority for the Plans and advise them that:
 - a. The permittee observed a triggering event;
 - b. The event happened despite the fact that erosion and sediment controls were properly installed and maintained; and
 - c. The permittee is reviewing plans and will afford the approval authority the opportunity to concurrently review them.The permittee's review of plans shall begin within three days of the triggering event. The permittee must submit revised plans to the approval authority no later than 14 days of the second observation of a triggering event. The permittee must obtain approval of the revised Plans from the approval authority and begin implementation of the changes immediately upon approval.

- C. Monitoring and Records.** For the purposes of monitoring, a permittee must do all the following:
1. During construction, maintain at the site the approved erosion and sediment control plan, the approved stormwater management plan, a copy of this General Permit, a copy of the NOI application and a copy of the NOI approval form.
 2. During the entire period of permit coverage, for all active and inactive sites, conduct inspections of the permitted area at the following intervals:
 - a. Weekly;
 - b. The next day after a rainfall event resulting in runoff; and

- c. As required in Part IV.B.
- 3. Maintain at the site written reports of all inspections conducted by the permittee. The permittee shall use the standard written report form as provided by MDE. The permittee shall complete all applicable portions of the form, and may attach additional information to the form. The permittee shall ensure that the report includes:
 - a. the date and time of the inspection;
 - b. the name(s) of the individual(s) who performed the inspection;
 - c. whether significant amounts of sediment were observed as described in Part IV.B, Prevention of the Discharge of Significant Amounts of Sediment, above.;
 - d. an assessment of the condition of erosion and sediment controls and how any deficiencies were or are being addressed;
 - e. a description and date of any erosion and sediment control implementation and maintenance performed, including identification of any controls that have not been installed as required; and
 - f. a description of the site's present phase of construction.
- 4. Maintain pertinent data related to the NOI (including all data used to complete the NOI), self-inspection reports and inspection reports and enforcement actions issued to the permittee by the appropriate enforcement authority, including but not limited to all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, for a period of three (3) years from the date that the site is permanently stabilized as follows:
 - a. Permittees must retain the records described in Part IV and V and records of all data used to complete the NOI to be covered by this permit. Maintain at the site written reports of all inspections conducted by the permittee as required by Part IV. C.
 - b. Maintain all inspection reports and enforcement actions issued to the permittee from any appropriate enforcement or approval authority, including MDE, the delegated enforcement authority, or the U.S. Environmental Protection Agency.
 - c. Records of monitoring information must include:
 - i. The date, exact place, and time of sampling or measurements;
 - ii. The individual(s) who performed the sampling or measurements;
 - iii. The date(s) analyses were performed;
 - iv. The individual(s) who performed the analyses;
 - v. The analytical techniques or methods used; and
 - vi. The results of such analyses.
- 5. Ensure that samples and measurements taken for the purpose of monitoring are representative of the monitored activity.
- D. Reporting Requirements.** The permittee shall submit, upon request by MDE, the information maintained in accordance with Part IV. B. to:

The Maryland Department of the Environment
 Water Management Administration
 Compliance Program
 1800 Washington Blvd, Ste 420
 Baltimore, Maryland 21230-1708

Part V. CONSISTENCY WITH TOTAL MAXIMUM DAILY LOADS

If the discharge covered by this permit enters a water with an established or approved Total Maximum Daily Load (TMDL), the permittee must implement measures to ensure that the discharge of pollutants from the site is consistent with the assumptions and meets the requirements of the approved TMDL, including any specific wasteload allocation that has been established that would apply to the discharge.

Part VI. STANDARD PERMIT CONDITIONS

- A. Duty to Comply.** It is a condition of this permit that the permittee comply with erosion and sediment control and stormwater management plans approved in accordance with the laws and regulations cited in Part II. A.3, above, and with all conditions of this general permit. If MDE adopts applicable requirements after the effective date of this permit, including but not limited to

revised Standards and Specifications for Soil Erosion and Sediment Control or requirements that permittees implement environmental site design through the use of nonstructural best management practices and other better site design techniques, the permittee must comply with those requirements by the deadline set forth in those requirements. Violations of plans for construction activity, including applicable Erosion and Sediment Control and Stormwater Management Plans, constitute violations of this permit, State law, and the CWA. Violations of this permit are grounds for enforcement action; for permit termination, revocation, reissuance, or modification; or for denial of a permit renewal.

- B. Continuation of Coverage under This General Permit.** Once construction has commenced, it is a condition of this permit that erosion and sediment control and stormwater management plan approvals be kept in effect. Construction activity may not continue if these plans have expired, but may resume once plans are renewed without payment of an additional fee as long as coverage under this General Permit is still in effect.
- C. Continuation of the Expired General Permit.** An expired general permit continues in force and effect until a new general permit is issued.
- D. Need to Halt or Reduce Activity Not a Defense.** It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this general permit.
- E. Duty to Mitigate.** The permittee shall take all reasonable steps to prevent or minimize the environmental or human health impact caused by any discharge allowed by this general permit.
- F. Proper Operation and Maintenance.** The permittee shall at all times properly operate and maintain all systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. Proper operation and maintenance requires the installation and operation of backup, auxiliary, or similar systems or controls, by a permittee when necessary to achieve compliance with the conditions of the permit.

G. Bypass

1. Definitions.

- a. Bypass means the intentional diversion of waste streams from any portion of a treatment facility.
- b. Severe property damage means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

2. Bypass not exceeding limitations. The permittee may allow any bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation.

3. Notice—

- a. Anticipated bypass. If the permittee knows in advance of the need for a bypass, the permittee must submit prior notice, if possible at least ten days before the date of the bypass.
- b. Unanticipated bypass. The permittee must submit notice of an unanticipated bypass as soon as possible to the time when it is known, but in no case longer than 24-hours after learning of the event.

4. Prohibition of bypass.

- a. Bypass is prohibited, and MDE or EPA may take enforcement action against the permittee for bypass, unless:
 - (1) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;
 - (2) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and

- (3) The permittee submitted notices as required.
- b. MDE or EPA may approve an anticipated bypass, after considering its adverse effects, if MDE or EPA determines that the bypass meets the three conditions listed above.

H. Upset

1. Definition. Upset means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the permittee's reasonable control. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.
2. Effect of an upset. An upset constitutes an affirmative defense to an action brought for noncompliance with such technology based permit effluent limitations if the requirements of Part VI.H.3, below, are met. No determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, is final administrative action subject to judicial review.
3. Conditions necessary for a demonstration of upset. A permittee who wishes to establish the affirmative defense of upset must demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:
 - a. An upset occurred and that the permittee can identify the cause(s) of the upset;
 - b. The permitted facility was at the time being properly operated;
 - c. The permittee submitted notice of the upset as required; and
 - d. The permittee complied with any required remedial measures.
4. Burden of proof. In any enforcement proceeding, the permittee, as the one seeking to establish the occurrence of an upset, has the burden of proof.

I. Duty to Provide Information. The permittee shall furnish to the Director, within a reasonable time, any information which the Director may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit or to determine compliance with this permit. The permittee shall also furnish to the Director upon request copies of records required to be kept by this permit, State law, or the CWA.

J. Other Information. When the permittee becomes aware that he or she failed to submit any relevant facts or submitted incorrect information in the NOI or in plans approved in accordance with the laws and regulations cited in Part II. A., he or she shall promptly submit such facts or information to the Director or the appropriate plan review authority.

K. Certification. Any person signing documents under this section shall provide certification in accordance with the laws and regulations identified in Part VI. L below.

L. Signatory Requirements. All submissions of reports, certifications or information shall be signed in accordance with requirements established in Title 4, Subtitle 1 of the Environment Article, Annotated Code of Maryland (Sediment Control); COMAR 26.17.01 (Erosion and Sediment Control); Title 4, Subtitle 2 of the Environment Article, Annotated Code of Maryland (Stormwater Management); and COMAR 26.17.02 (Stormwater Management). All Notices of Intent shall be signed as follows:

For a corporation: by a responsible corporate officer;

For a partnership or sole proprietorship: by a general partner or the proprietor, respectively;

For a municipality, State, federal, or other public agency: by either a principal executive officer or a duly authorized official.

M. Liabilities under Other Laws. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under section 309 of the CWA, any applicable State or Federal law, or regulation under authority preserved by section 510 of the CWA.

N. Property Rights. The issuance of this permit does not convey any property rights of any sort, nor any exclusive privileges, nor does it authorize any injury to private property nor any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations.

O. Severability. The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

- P. **Transfers.** This permit is not transferable to any person except after notice to the Director in accordance with Part I. F. above. As part of such transfer, the Director may require separate application for an individual permit as stated in Part I. D.
- Q. **Inspection and Entry.** The permittee shall allow the Director or an authorized representative of EPA or the State who is assigned responsibilities in the laws and regulations cited in Part II. A., upon the presentation of credentials and other documents as may be required by law, to:
1. Enter upon the permittee's premises where a regulated activity is located or conducted or where records must be kept under the conditions of this permit;
 2. Have access to and obtain copies at reasonable times of any records that must be kept under the conditions of this permit; and
 3. Inspect at reasonable times, without prior notice, any construction site, facility, equipment (including monitoring and control equipment), practices or operations regulated or required under this permit.
 4. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act, any substances or parameters at any location.
- R. **Civil Penalties for Violations of Permit Conditions.** In addition to civil penalties for violations of State water pollution control laws set forth in Section 9-342 of the Environment Article, Annotated Code of Maryland, the Clean Water Act and EPA regulations at 40 C.F.R. Part 19 provide that any person who violates Section 301, 302, 306, 307, 308, 318 or 405 of the Act, or any permit condition or limitation implementing any such sections in a permit issued under Section 402 of the Act or in a permit issued under Section 404 of the Act, is subject to a civil penalty not to exceed \$32,500 per day for each violation. In the event that the sovereign immunity of the United States and its agencies does not apply, such penalties may be assessed for violations.
- S. **Criminal Penalties for Violations of Permit Conditions.** In addition to the criminal penalties for violations of State water pollution control laws set forth in Section 9-343 of the Environment Article, Annotated Code of Maryland, the Clean Water Act provides that:
1. Any person who negligently violates Section 301, 302, 306, 307, 308, 318, or 405 of the Act, or any permit condition or limitation implementing any of such sections in a permit issued under Section 402 of the Act, or in a permit issued under Section 404 of the Act, is subject to a fine of not less than \$2,500 nor more than \$25,000 per day of violation, or by imprisonment for not more than one year, or by both;
 2. Any person who knowingly violates Section 301, 302, 306, 307, 308, 318, or 405 of the Act, or any permit condition or limitation implementing any of such sections in a permit issued under Section 402 of the Act, or in a permit issued under Section 404 of the Act, is subject to a fine of not less than \$5,000 nor more than \$50,000 per day of violation, or by imprisonment for not more than three years, or by both;
 3. Any person who knowingly violates Sections 301, 302, 306, 307, 308, 318, or 405 of the Act, or any permit condition or limitation implementing any of such sections in a permit issued under Section 402 of the Act, or in a permit issued under Section 404 of the Act, and who knows at that time that he is placing another person in imminent danger of death or serious bodily injury, is subject to a fine of not more than \$250,000 or imprisonment for not more than 15 years, or both;
 4. Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under the Act or who knowingly falsifies, tampers with or renders inaccurate any monitoring device or method required to be maintained under the Act, is subject to a fine of not more than \$50,000 or by imprisonment for not more than two years, or by both.
- T. **Permit Actions.** This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation, reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Part VII. REOPENER CLAUSE

At any time at the discretion of MDE or the U.S. Environmental Protection Agency, or if there is evidence indicating that stormwater discharges authorized by this permit cause, have the reasonable potential to cause or contribute to an excursion above any applicable water quality standard, MDE may require the owner or operator of such discharge to obtain an individual permit or alternative general permit coverage in accordance with Part I. D. of this permit. Alternatively, MDE may revoke this permit or modify this permit to include different limitations and requirements, in accordance with the procedures contained in COMAR 26.08.04.10 and 40 C.F.R. §§ 122.62, 122.63, 122.64 and 124.5.

Part VIII. AUTHORITY TO ISSUE GENERAL NPDES PERMITS

On September 5, 1974, the Administrator of the EPA approved the proposal submitted by the State of Maryland for the operation of a permit program for discharges into navigable waters under Section 402 of the federal Clean Water Act, 33 U.S.C. Section 1342. On May 15, 1989, EPA and Maryland entered into a superseding Memorandum of Agreement for such discharges. On September 30, 1990, the Administrator of the EPA approved the proposal submitted by the State of Maryland for the operation of a general permit program. Under the approvals described above, this general discharge permit is both a State of Maryland general discharge permit and an NPDES general discharge permit.

Part IX. DEFINITIONS

The following words and terms used in this chapter have the following meanings unless the context clearly indicates otherwise. Terms used in this permit and not otherwise defined herein shall have the meaning attributed to them in 40 C.F.R. Part 122.

1. "Administration" means The Maryland Department of the Environment, Water Management Administration.
2. "Appropriate approval authority" means the state or local government agency that has authority to review and approve Erosion and Sediment Control Plans and Stormwater Management Plans.
3. "Construction Activity" means clearing, grading and/or excavating activities that result in a land disturbance equal to or greater than one acre, including the disturbance of less than one acre of land that is part of a larger common plan of development or sale that will ultimately disturb more than one acre.
4. "CWA" means the federal Clean Water Act, 33 U.S.C. §§ 1251 *et seq.*, or the Federal Water Pollution Control Act or the Amendments to the Clean Water Act, and regulations promulgated thereunder.
5. "Director" means the Regional Administrator, the Secretary of the Maryland Department of the Environment, or an authorized representative.
6. "Larger common plan of development or sale" means an area where multiple separate and distinct construction activities are occurring under one plan. The "plan" in a common plan of development or sale is broadly defined as any announcement or piece of documentation (including a sign, public notice or hearing, sales pitch, advertisement, drawing, permit application, zoning request, computer design, etc.) or physical demarcation (including boundary signs, lot stakes, surveyor markings, etc.) indicating that construction activities may occur on a specific plot.
7. "Permanent stabilization" means that all soil disturbing activities at the site have been completed and the following criteria are met, whichever is most stringent:
 - a. The site meets the stabilization requirements in the approved plans;

- b. The site meets stabilization requirements in the 1994 Standards and Specifications for Soil Erosion and Sediment Control or any updated standards issued by MDE (after their effective date); or
 - c. Either of the two following criteria are met:
 - i. A uniform (e.g., evenly distributed, without large bare areas) perennial vegetative cover with a density of 70 percent of the native background vegetative cover for the area has been established on all unpaved areas and areas not covered by permanent structures, or
 - ii. Equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.
 - iii. When background native vegetation will cover less than 100 percent of the ground (e.g., arid areas, beaches), the 70 percent coverage criteria is adjusted as follows: if the native vegetation covers 50 percent of the ground, 70 percent of 50 percent ($0.70 \times 0.50 = 0.35$) would require 35 percent total cover for final stabilization. On a beach with no natural vegetation, no stabilization is required.
 - d. For construction projects on land used for agricultural purposes (e.g., pipelines across crop or range land, staging areas for highway construction, etc.), final stabilization may be accomplished by returning the disturbed land to its preconstruction agricultural use. Areas disturbed that were not previously used for agricultural activities, such as buffer strips immediately adjacent to "water of the United States," and areas which are not being returned to their preconstruction agricultural use must meet the final stabilization criteria (a), (b), or (c) above.
8. "Person" is as defined in COMAR 26.17.01 (Erosion and Sediment Control) and COMAR 26.17.02 (Stormwater Management).
9. "Plans" means a permittee's Erosion and Sediment Control Plan and Stormwater Management Plan, collectively.
10. "Project" means the total area upon which construction activity will occur through stages or phases over time.
11. "Site" means any area where Permittee engages in Construction Activity and where coverage under an applicable permit is required.
12. "Stormwater" means precipitation runoff, snowmelt runoff, and surface runoff and drainage.
13. "Stormwater Associated with Construction Activity" means the discharge from any conveyance which is used for collecting and conveying stormwater and which is directly related to clearing, grading, and/or excavation activities.

Jay Sakai, Director
Water Management Administration

STANDARD INSPECTION FORM

GENERAL PERMIT FOR STORMWATER ASSOCIATED WITH CONSTRUCTION ACTIVITY

General Information			
Project Name			
Permittee			
NOI #		Date of Inspection	
Start Time		End Time	
Inspector's Name(s)			
Green Card Certification #			
Inspector's Contact Information			
Describe present phase of construction	<div style="display: flex; justify-content: space-between;"> <input type="checkbox"/> Clearing/Grubbing <input type="checkbox"/> Rough Grading <input type="checkbox"/> Infrastructure <input type="checkbox"/> Demolition </div> <div style="display: flex; justify-content: space-between;"> <input type="checkbox"/> Building Construction <input type="checkbox"/> Final Grading <input type="checkbox"/> Final Stabilization </div>		
Notes:			
Type of Inspection: <input type="checkbox"/> Weekly routine <input type="checkbox"/> Pre-storm event <input type="checkbox"/> During storm event <input type="checkbox"/> Post-storm event <input type="checkbox"/> Due to a discharge of significant amounts of sediment			
Has there been a storm event since the last inspection? <input type="checkbox"/> Yes <input type="checkbox"/> No If yes, provide: Storm Start Date & Time: Storm Duration (hrs): Approximate Amount of Precipitation (in):			

Permit Coverage and Plans				
	Subject	Status	Corrective Action Needed and Notes	Date Corrected
1	Was an NOI submitted for all disturbed acres?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
2	Is the permittee listed above still in control of permitted activities at the site? (If no, submit a Transfer of Authorization form to MDE)	<input type="checkbox"/> Yes <input type="checkbox"/> No		
3	Do the approved plans reflect current site conditions?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
4	Are the approved E&S and SWM plans maintained at the site?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
5	Have the E&S or SWM plan approvals expired?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
5	Are all inspection reports and enforcement actions on file at the site?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
6	Is the site permanently stabilized, temporary erosion and sediment controls are removed or set to be removed, and stormwater discharges from construction activity are eliminated?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
7	If #6 is Yes, has a Notice of Termination been submitted to MDE?	<input type="checkbox"/> Yes <input type="checkbox"/> No		

Permit Coverage and Plans				
	Subject	Status	Corrective Action Needed and Notes	Date Corrected
8	Are all discharges composed entirely of stormwater or as authorized by the permit?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Discharge of significant amounts of sediment				
	Subject	Status	Notes	
	Is there evidence of the discharge of significant amounts of sediment to surface waters, or conveyance systems leading to surface waters?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
<i>A discharge of significant amounts of sediment may be indicated by (but is not limited to) observations of the following. Note whether any are observed during this inspection:</i>				
1	Earth slides or mud flows	<input type="checkbox"/> Yes <input type="checkbox"/> No		
2	Concentrated flows of stormwater such as rills, rivulets or channels that cause erosion when such flows are not filtered, settled or otherwise treated to remove sediment	<input type="checkbox"/> Yes <input type="checkbox"/> No		
3	Turbid flows of stormwater that are not filtered, settled or otherwise treated to reduce turbidity	<input type="checkbox"/> Yes <input type="checkbox"/> No		
4	Deposits of sediment at the construction site in areas that drain to unprotected stormwater inlets or catch basins that discharge directly to surface waters	<input type="checkbox"/> Yes <input type="checkbox"/> No		
5	Deposits of sediment from the construction site on public or private streets outside of the permitted construction activity	<input type="checkbox"/> Yes <input type="checkbox"/> No		
6	Deposits of sediment from the construction site on any adjacent property outside of the permitted construction activity	<input type="checkbox"/> Yes <input type="checkbox"/> No		
7	Discharges from the construction site to municipal conveyances, curbs and gutters, or streams running through or along the site where visual observations show that the discharges differ from ambient conditions in terms of turbidity so as to indicate significant amounts of sediment present in them	<input type="checkbox"/> Yes <input type="checkbox"/> No		

BMPs					
BMP/activity (some recommended items to check included below)	Installed /Imple- mented?	Maintenance Required?	Location	Corrective Action Needed and Notes (note any BMPs required by plans but not yet installed)	Date Correction Completed
1 Temporary stabilization - within 7 or 14 days in accordance with 26.17.01.07(B)(3)(e)(iv)	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
2 Permanent stabilization - within 7 or 14 days in accordance with 26.17.01.07(B)(3)(e)(iv)	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
3 Stockpile protection - check for stabilization, silt fence or other controls	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
4 Are natural resource areas (e.g., streams, wetlands, mature trees, etc.) protected with barriers or similar BMPs?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
5 Silt fence - check for proper installation including toeing in, stakes and supports, gaps and tears, and sediment buildup	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
6 Check dams, dikes, and diversion ditches	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
7 Storm drain inlet protection - check for gaps, tears, sediment buildup	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			

BMPs					
BMP/activity (some recommended items to check included below)	Installed /Imple- mented?	Maintenance Required?	Location	Corrective Action Needed and Notes (note any BMPs required by plans but not yet installed)	Date Correction Completed
8 Construction entrance - check for trackout, soil buildup on entrance	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
9 Sediment basins/traps - check for sediment buildup, erosion, proper outlet structures	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
10 Outfall protection - check for erosion, sediment	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
11 Is trash/litter from work areas collected and placed in covered dumpsters?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
12 Are washout facilities (e.g., paint, stucco, concrete) available, clearly marked, and maintained?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
13 Are vehicle and equipment fueling, cleaning, and maintenance areas free of spills, leaks, or any other deleterious material?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
14 Are materials that are potential stormwater contaminants stored inside or under cover?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			

BMPs						
	BMP/activity (some recommended items to check included below)	Installed /Imple- mented?	Maintenance Required?	Location	Corrective Action Needed and Notes (note any BMPs required by plans but not yet installed)	Date Correction Completed
15	Are non-stormwater discharges (e.g., wash water, dewatering) properly controlled?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No			
16	(Other)	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Yes <input type="checkbox"/> No

**TRANSFER OF AUTHORIZATION
FOR INDIVIDUAL AND GENERAL PERMITS FOR STORMWATER
ASSOCIATED WITH CONSTRUCTION ACTIVITY**

This Transfer of Authorization form is to be completed by a permittee who holds an Individual or General Permit for Stormwater Associated with Construction Activity, in accordance with the Environmental Protection Agency's National Pollutant Discharge Elimination System stormwater program, if the permittee intends that another person assume control of permitted activities on the site or if the site's ownership changes. In this event, the permittee (the "transferor") must familiarize the person who is assuming control of the permitted activities (the "transferee") with the program and provide the transferee with a copy of the Permit. The transferor and transferee must both sign this form. The completed forms should be submitted by the transferor to the Maryland Department of the Environment, WMA - Compliance Program, 1800 Washington Boulevard, Suite 420, Baltimore, Maryland, 21230. For individual permits, the transfer shall become effective upon issuance of a modified individual permit by the Department. For general permits, the transfer shall become effective after receipt of a completed Transfer of Authorization form, signed by both the transferor and transferee.

State Discharge Permit Number (if assigned):

Name of Transferor/Permittee:

Address of Transferor/Permittee:

Site Name and Location (description, including County and mailing address if available):

Transferor Signature and Date

Name of Person/Entity to Whom Coverage is Being Transferred (i.e., Transferee):

Address of Person/Entity to Whom Coverage is Being Transferred:

Phone Number of Person/Entity to Whom Coverage is Being Transferred:

Name of Contact Person for Site (the person MDE should contact for compliance inspections or other site information):

Phone Number of Contact Person:

Proof of workers' compensation coverage is required under § 1-202 of the Environment Article. State and Federal agencies have coverage and do not need to provide this information. All other transferees (except individuals) must provide either worker's compensation coverage information or a certificate of compliance. MDE will not begin transfer the permit until this information is received. If you have a Certificate of Compliance issued by the Maryland Workers' Compensation Commission, you may provide a copy of the Certificate with this application instead of the Workers' Compensation Insurance information above. If you believe you qualify for a Certificate but do not yet have one, contact the Maryland Workers' Compensation Commission Certificate of Compliance Coordinator via telephone, (410) 864-5297, outside Baltimore Metro area toll free (800) 492-0479 selecting extension 5297 when prompted, or via email: COC@wcc.state.md.us.

I acknowledge this transfer of authorization under the terms of the permit. I understand that I must abide by all conditions of the permit, erosion and sediment control plan and stormwater management plan. I certify that the information concerning ownership/control of this site/project is accurate. I am responsible for the construction activities of this site/project, for satisfying the requirements of this discharge permit, and any civil or criminal penalties incurred due to violations of this permit, as set forth in Maryland and/or federal laws and regulations.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

NOTICE OF TERMINATION

This Notice of Termination form is to be completed upon final stabilization of the construction area covered by an Individual or General Permit for Stormwater Associated with Construction Activity, in accordance with the Environmental Protection Agency's National Pollutant Discharge Elimination System stormwater program. Upon completion of this form, the permittee should sign and submit it to the Maryland Department of the Environment, WMA - Compliance Program, Montgomery Park Business Center, 1800 Washington Boulevard, Suite 420, Baltimore, Maryland, 21230.

Permittee Certification

I certify under penalty of law that disturbed soils at the identified site have been acceptably stabilized and temporary erosion and sediment controls have been removed or will be removed at an appropriate time and that all stormwater discharges associated with construction activity from this site that are authorized by this permit have been eliminated. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge stormwater associated with construction activity by the permit and that discharging pollutants in stormwater associated with construction activity to the waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by an NPDES permit. I also understand that the submittal of this Notice of Termination does not release the permittee from liability for any violations of this Permit or the Clean Water Act which may have occurred at this site.

(signature of permittee)
